Company Profile

Opatra is an internationally acclaimed brand recognised for its unique 100% customer-oriented approach, thereby gaining global prominence within the skincare industry.

Opatra Ltd. is a British based manufacturer that is turning leading scientific breakthroughs and technological innovations into potent skincare solutions. Since 2010 we've been pioneering easy-to-use devices and skincare that helps all skin types look firmer, younger, brighter, and more beautiful.

We develop, design and source ground-breaking skin care devices and skincare products, alongside professional equipment. Opatra is a selective skincare brand specially formulated for the skins daily care and addressed to professionals in beauty salons, spas and aesthetic clinics and available to both professional and consumer market. Our product lines include anti-ageing handheld devices, skincare, professional facial and body equipment and accessories.

We are based in the UK and hold offices in Spain and Las Vegas. In the past years we've gathered many accounts including British Airways - High Life Magazine, TJC Shopping Channel, specialty retail locations and various single and chain stores and kiosks around Europe and Worldwide.

Our Mission

Opatra has not only developed a set of beauty products and devices for external care but have devised a contemporary way of thinking about beauty and wellbeing. This is achieved through integrating cutting edge skin care technology and a deep understanding and appreciation of skincare requirements. Therefore, a key element in our business model is to reject outdated ideas and expectations around beauty and perfection in a bid to find consistent and achievable outcomes for all skin types. Based on this ethos Opatra have created a unique and versatile range of products and devices for all skin types.

Our Vision

Individual value is not determined by external facets but is achieved through synthesising both internal and external factors, taking a holistic approach to beauty and wellbeing. Our holistic approach ensures that both the inner and outer self come together to achieve a true sense of balance and beauty. The external self is always the first form of communication with others. However, beauty is not only skin deep. The balance is achieved by drawing together self-esteem, self-belief and of course, external appearance. By combining these factors, a true lasting impression of health, happiness and confidence can be achieved.

Creating true beauty evolves from embracing our natural imperfections - our products can enable you to achieve the closest sense of personal perfection.

Our Goal

A key element in our business model is to reject outdated ideas around beauty and perfection in a bid to find practical and achievable results. Low self-esteem coupled with a beauty industry built on generic ideas of beauty and perfection build unrealistic expectations. OPATRA celebrates natural, individuality and personal beauty goals. Discovering ways to enable others to accomplish a sense of empowerment and self-worth through using OPATRA skincare products and devices on a global and ethical level. Embracing a holistic approach ensures that both the internal and external self come together to achieve a true sense of balance and beauty.

Timeless Beauty

Taking care of your skin is often categorised under that catch-all and often dismissive term: 'beauty'. But at Opatra, we take skin and its health seriously – and with good reason; it is, after all, the largest organ in the body. And because we believe in the positive power appropriate skincare can have on our clients' overall wellbeing – and we are tapped into the latest scientific and technological breakthroughs and advances – we are uniquely positioned to offer evidence-based scientific solutions to help you really take care of this vital organ.

Launched in 2010, Opatra has been at the vanguard of revolutionary at-home and professional devices that feature high-grade technology ever since. Our Synergy Collection is the latest innovation from the stable and, from the comfort of your own home, it allows you to achieve clinic-quality firmer, brighter and younger-looking skin. And for those who want to achieve the effects of a facelift minus an invasive procedure? Enter our Dermisonic device, which combines four scientifically cutting-edge treatments: galvanic technology, ultrasound stimulation, LED light therapy and ultrasonic sound waves.

Since Dermisonic's launch, the plaudits from our clients have continued to roll in. Smoothness, radiance and even skin 'perfection' are terms that have been cropped up again and again, and that is thanks to the multi-action device's capacity to smooth out facial wrinkles; tighten facial muscles; boost blood circulation; and stimulate new skin production. Once upon a time, this could only have been achieved with extensive visits to a dermatology clinic, and an under-the-knife procedure. Today, all this comes in the form of one single powerful hand-held tool.

For clients who wish to plump skin, we are proud to introduce Opatra Synergy, our newest innovation that creates its stunning effect by using a winning combination of LED light and heat therapy. Together, these act as a catalyst for collagen production by stimulating the fibroblasts to create more of the skin's natural plumping agent. Plus, thanks to its dual wavelengths, infra-red and red light, any pain is lessened, all the while making skin as radiant as it can be. Opatra's excellent anti-ageing creams or serums reach deep under the skin, courtesy of the red LED Light (which also improves circulation, expression lines and regenerating cell connections), while the green LED restores cells and enables the oxygen to reach them, which in turn improves dark circles, sunspots and other blemishes.

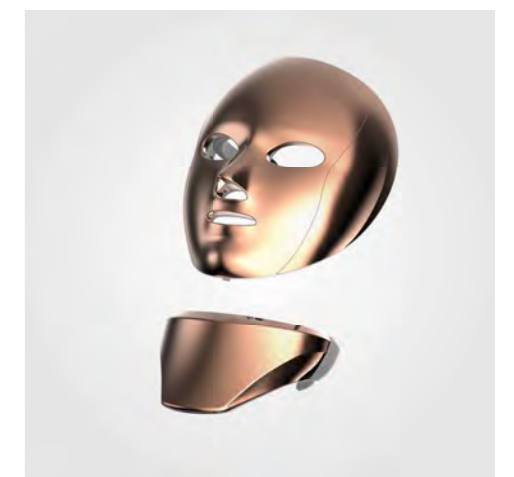

We have supreme faith in our ground-breaking products; in fact, so deep-held is our belief that all of our products come with a lifetime warranty. Who says beauty is only skin deep?
